

**You're insured.** Now let's make your business and your employees even safer.

### Policyholder benefits

#### Policyholder dashboard

Easy access to policy documents, scan reports, alerts, risk management resources, and claim information

#### Breach response

In the event of a cyber incident, you'll get access to a breach coach to help you navigate the incident and access to trusted vendors for critical response services

#### Quarterly scan reports

Dynamic Loss Prevention™ reports are delivered quarterly, providing IT security analysis and actionable recommendations

#### Claims handling

We're there with you throughout a transparent claims process led by our seasoned team of cyber claims specialists

#### Cybersecurity alerts

When we discover critical security vulnerabilities, Corvus will notify you and your broker if your IT systems harbor the impacted software

#### Post-breach CISO consult

After a cyber incident, schedule a one-hour session with our Chief Information Security Officer to discuss security and resilience best practices

**vCISO Digital Experience** Accessed through your Policyholder Dashboard, vCISO starts with an online assessment that adds to the information already gathered by our IT scan and compiles a complete view of your security posture. You'll see **prioritized recommendations** paired with optional **free consultations** and **discounted services with top security vendors** (*see the following page for more*).

### Optional add-ons

#### Cybersecurity recommendations

Dig into all the details of your latest scan report on a call with a Corvus cyber expert

#### Phishing test & discounted services

Conduct a phishing test for your team from **KnowBe4**, a leading provider

#### Meet the breach coach

Discuss breach response process and preparedness with a top privacy attorney

#### Vendor contracting consult

Free 1-hour phone consultation with lawyers from **Beckage, a leading law firm**, on your vendor procurement process, IT contracting and more. Plus reduced rates for additional legal services

### Corvus Black Premier Services

Qualifying policyholders with over \$100mm in annual revenue are eligible for additional services including:

#### Meet our Risk + Response team

A one-hour onboarding call to introduce you to our Risk and Response Services. Highly suggested!

#### Incident response tabletop

A two-hour virtual exercise simulating a cyber breach to aid your response planning efforts

#### Incident response plan development

Consultation to help your team develop or revise your IRP

#### Vendor scan reports

Dynamic Loss Prevention (DLP) reports on up to ten vendors to help identify your third-party risk

**How to get started** Once your policy is complete, you'll get an email from Corvus inviting you to log into your Dashboard. Create your account and email [services@corvusinsurance.com](mailto:services@corvusinsurance.com) to request services.

## vCISO Services offers a suite of consultative sessions with top cybersecurity firms.

The process begins on your Policyholder Dashboard with the vCISO Assessment, a quick digital questionnaire that helps to complete the picture of your security posture. Once complete, you'll see the full list of prioritized security recommendations paired with one or more suggested vCISO Services.

With vCISO Services, you'll start with a **free, no-risk consultation** call to explore vendor options, and any services you ultimately select are offered at an **exclusive discounted rate**. Bottom line: you'll get pointed to the right service for your needs, from the best vendors in the market, with the most cost-effective pricing available.

### Multifactor Authentication Consult

Protect against unauthorized access with enhanced authentication.

Multifactor Authentication (MFA) protects against unauthorized account takeovers from stolen, reused, or guessed passwords. Our MFA Consult will help you determine which solution is right for your organization and support you through the implementation process.

### Endpoint Detection and Response Consult

Identify, deploy, and monitor an endpoint detection and response tool.

Our Endpoint detection and response (EDR) Consult will help your organization understand the importance and value of EDR, which solution is the best option for your organization, and how to properly deploy and monitor it.

### Backups Consult

Evaluate and improve backups solutions to minimize downtime.

Properly designed and secured backups provide protection and leverage in the fight against ransomware. Our consult will assess your current backup strategy and identify ways to strengthen your plan.

### Active Directory Consult

Implement best practices for security and resilience to help mitigate the escalation of cyber incidents.

Active Directory defines the full spectrum of your organization's permissions. Our consult works with your infrastructure team to analyze the architecture in place and provide recommendations to harden core infrastructure security.

### Network Segmentation Consult

Optimize security with network segmentation solutions.

Robust network segmentation complicates a threat actor's ability to infiltrate your network. Our consult works with your organization to identify ways to segment the network better to protect what's most important.

### Cloud Security Configuration Consult

Protect cloud-based systems, data, and infrastructure.

Our Cloud Security Configuration Consult addresses the increase in data stored in the cloud, identifies providers in use (such as MS365, Google Suite, Azure or AWS), and gives guidance on the proper security settings to enable or where you may need to implement additional tools.
