Corvus **Flight**

Automated Smart Cyber Insurance®

Maximize your bandwidth to focus on the key accounts that need your attention.

Corvus Flight is our digital solution enabling your retail partners to easily and instantly quote and bind Smart Cyber Insurance through our online platform, the CrowBar.

With Corvus Flight, your retail partners can quote and bind small and mid-sized accounts in less than five minutes, with no emailing or data entry for you or your team.

Benefits of Corvus Flight

Instant Setup for New Retail Partners

Set up your retail partners to quote with Corvus in just two minutes. You only need to know the brokerage website URL and your fee. *See next page for a walkthrough of the brief setup process.*
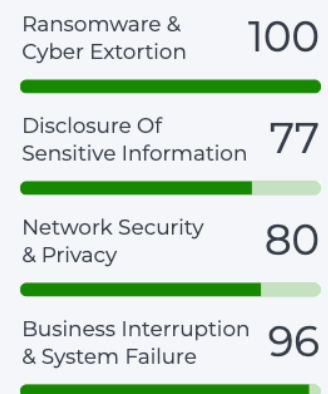

Tech-enabled Efficiency

Thanks to data from our proprietary Corvus Scan technology, our application requires just a handful of basic pieces of information, making it efficient for your retail partners to quote and bind.

Added Value for Every Account

Corvus delivers a Dynamic Loss Prevention® Report with every account that covers client IT security vulnerabilities and offers policyholders a suite of risk management tools to help mitigate cyber risk throughout the policy year.

Support from Corvus Underwriters

For accounts that require higher limits or that come from specialty high-risk classes, our underwriters are prepared to negotiate bespoke policy language and coverage on an individual account basis.

Risk Exposure Group	Score
Ransomware & Cyber Extortion	100
Disclosure Of Sensitive Information	77
Network Security & Privacy	80
Business Interruption & System Failure	96

Dynamic Loss Prevention®

81 CORVUS SCORE
Jan 1, 2020

Acme, Inc. scores in the 89th percentile
Corvus calculates percentile based on other companies with similar industry class and annual revenue.

Breakdown of Risk Exposure Groups

In addition to calculating an overall Corvus Score and benchmark percentile, the Corvus Scan also rates **8 types of risk exposure** and provides a score for each group.

The full Dynamic Loss Prevention Report (DLP) has **specific recommendations** to reduce risk exposure for each group, ranked by severity.

Ransomware & Cyber Extortion	100	Phishing & Dark Web Monitoring	100
Disclosure Of Sensitive Information	77	Contingent Business Interruption	98
Network Security & Privacy	80	Hacking, Malware, Unauthorized Access	0
Business Interruption & System Failure	96	Social Engineering & Cyber Crime	100

Preview Recommendations for Acme, Inc.

LOW IMPACT Defensibility : Hostname Attack Surface
We discovered 100 hostnames running web servers, which is a moderate surface area for attackers to find potential vulnerabilities. We recommend ensuring your organization has proper protocols in place to review all hostnames are required for business operations. This is general best practice to defend against any type of cyber attack.

LOW IMPACT Software Patching : Vulnerable Systems
We discovered 2 systems running end of life software or software with known security vulnerabilities. These systems should be updated to current, vendor-supported software to prevent the risk of attackers exploiting vulnerable systems to launch ransomware, malware, or other forms of attack.

Bind with Corvus for additional recommendations on the full DLP Report

Beyond the DLP: Cyber Risk Resources

In addition to quarterly DLP Reports, Corvus policyholders enjoy a **dedicated Breach Coach**, discounts with industry-leading vendors, and access to educational resources on our Risk Management Portal.

Corvus **Flight**

Key Features and Getting Started

With Corvus Flight, you'll eliminate data entry for your team, allowing for a higher volume of accounts. **Key features for wholesale brokers include:**

- **Unique link** for each retail agent to access the platform under your brokerage code.

- **Visibility** into all submissions and 24/7 access to binder, DLP report, application, quote, invoice, and policy.

- **Automated notices** of bind requests for each user and automated delivery of all documents post-bind

- **Surplus lines** taxes and fees information included to increase efficiency
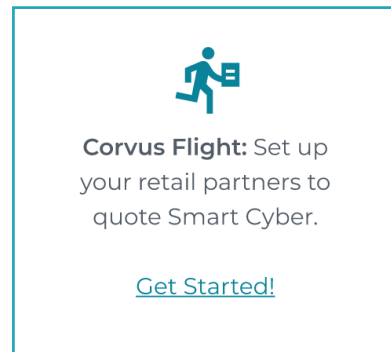

How You Can Take Flight

Just 3 steps to add a new retail partner to Corvus Flight

1. Log into the CrowBar and look for the Corvus Flight setup icon to the right side of your dashboard.

2. Following the instructions in the platform, all you'll need is your retail partner's brokerage name, email domain ("@brokeragesite.com"), and your fee.

3. You'll have an opportunity to notify your retail partner right away by email, letting them know they're ready to start quoting. We've included pre-written information about Flight in this email about how your partner can get set up. You can customize this message as much as you'd like.

Once your retail partner initiates their own setup, they'll receive an email that allows them to start their first submission, with no further password or login required. They can truly get set up in minutes!

Corvus Flight: Set up your retail partners to quote Smart Cyber.
