

You're insured.

Now let's make your business and your employees even safer.

Policyholder benefits

Policyholder dashboard

Easy access to policy documents, scan reports, alerts, risk management resources, and claim information

Quarterly scan reports

Dynamic Loss Prevention™ reports are delivered quarterly, providing IT security analysis and actionable recommendations

Cybersecurity alerts

When we discover critical security vulnerabilities, Corvus will notify you and your broker if your IT systems harbor the impacted software

Breach response

In the event of a cyber incident, you'll get access to a breach coach to help you navigate the incident and access to trusted vendors for critical response services

Claims handling

We're there with you throughout a transparent claims process led by our seasoned team of cyber claims specialists

Post-breach CISO consult

After a cyber incident, schedule a one-hour session with our Chief Information Security Officer to discuss security and resilience best practices

vCISO Digital Experience Accessed through your Policyholder Dashboard, vCISO starts with an online assessment that adds to the information already gathered by our IT scan and compiles a complete view of your security posture. You'll see **prioritized recommendations** paired with optional **free consultations** and **discounted services with top security vendors** (*see the following page for more*).

Optional add-ons

Cybersecurity recommendations

Dig into all the details of your latest scan report on a call with a Corvus cyber expert

Phishing test & discounted services

Conduct a phishing test for your team from **KnowBe4**, a leading provider

Meet the breach coach

Discuss breach response process and preparedness with a top privacy attorney

Vendor contracting consult

Free 1-hour phone consultation with **lawyers from Beckage, a leading law firm**, on your vendor procurement process, IT contracting and more. Plus reduced rates for additional legal services

How to get started If you're already a Corvus policyholder, please email services@corvusinsurance.com to request access to your Policyholder Dashboard.

vCISO Services offers a suite of consultative sessions with the industry's top cybersecurity firms.

vCISO Services aims to help an organization dig deeper into specific issues and find the right offering to meet their needs. The process begins with a free, no-risk consultation call to explore options and find the best solution. Any further services selected are offered at an exclusive discounted rate.

With vCISO Services, organizations can explore their options, find the best provider to meet their needs, and strengthen their systems against cyber-attacks – **all cost-effectively and with the best vendors in the market.**

Multifactor Authentication Consult

Protect against unauthorized access with enhanced authentication.

Multifactor Authentication (MFA) protects against unauthorized account takeovers from stolen, reused, or guessed passwords. Our MFA Consult will help you determine which solution is right for your organization and support you through the implementation process.

Endpoint Detection and Response Consult

Identify, deploy, and monitor an endpoint detection and response tool.

Our Endpoint detection and response (EDR) Consult will help your organization understand the importance and value of EDR, which solution is the best option for your organization, and how to properly deploy and monitor it.

Backups Consult

Evaluate and improve backups solutions to minimize downtime.

Properly designed and secured backups provide protection and leverage in the fight against ransomware. Our consult will assess your current backup strategy and identify ways to strengthen your plan.

Active Directory Consult

Implement best practices for security and resilience to help mitigate the escalation of cyber incidents.

Active Directory defines the full spectrum of your organization's permissions. Our consult works with your infrastructure team to analyze the architecture in place and provide recommendations to harden core infrastructure security.

Network Segmentation Consult

Optimize security with network segmentation solutions.

Robust network segmentation complicates a threat actor's ability to infiltrate your network. Our consult works with your organization to identify ways to segment the network better to protect what's most important.

Cloud Security Configuration Consult

Protect cloud-based systems, data, and infrastructure.

Our Cloud Security Configuration Consult addresses the increase in data stored in the cloud, identifies providers in use (such as MS365, Google Suite, Azure or AWS), and gives guidance on the proper security settings to enable or where you may need to implement additional tools.
